Steel tubes for boilers, superheaters and heat exchangers — Dimensions, tolerances and conventional masses per unit length

Tubes en acier soumis à la flamme pour générateurs de vapeur et tubes en acier pour échangeurs de chaleur — Dimensions, tolérances et masses linéiques conventionnelles

Second edition — 1980-03-15

UDC 621.643.23 : 621.181.021

Ref. No. ISO 1129-1980 (E)

Descriptors : piping, steel tubes, boiler tubes, unalloyed steels, alloy steels, austenitic steels, stainless steels, ferritic steels, martensitic steels, dimensions, dimensional tolerances, linear density, diameters, thickness.

ISO 1129-1980 (E)

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 1129 was developed by Technical Committee ISO/TC 5, *Metal pipes and fittings*, and was circulated to the member bodies in March 1979.

It has been approved by the member bodies of the following countries :

Australia	India	Romania
Austria	Israel	South Africa, Rep. of
Belgium	Italy	Spain
Canada	Japan	Sweden
Chile	Korea, Rep. of	Switzerland
Czechoslovakia	Libyan Arab Jamahiriya	Turkey
Denmark	Mexico	United Kingdom
Finland	Netherlands	USSR
France	Norway	

No member body expressed disapproval of the document.

This second edition cancels and replaces the first edition (i.e. ISO 1129-1977).
