FOREWORD

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 113/1 was developed by Technical Committee ISO/TC 4, *Rolling bearings*.

It was submitted directly to the ISO Council, in accordance with clause 6.13.1 of the Directives for the technical work of ISO. It cancels and replaces clause 1 of ISO Recommendation R 113-1969, which had been approved by the member bodies of the following countries :

Australia	Hungary	Sweden
Austria	India	Switzerland
Brazil	Italy	Turkey
Canada	Japan	United Kingdom
Czechoslovakia	Netherlands	USA
Egypt, Arab Rep. of	Poland	Yugoslavia
France	Romania	
Germany, F.R.	Spain	

No member body had expressed disapproval of the document.
