Descriptors : paints, pigments, zinc chromates, characteristics, materials specifications, tests, chemical analysis.

FOREWORD

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO Member Bodies). The work of developing International Standards is carried out through ISO Technical Committees. Every Member Body interested in a subject for which a Technical Committee has been set up has the right to be represented on that Committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the Technical Committees are circulated to the Member Bodies for approval before their acceptance as International Standards by the ISO Council.

Prior to 1972, the results of the work of the Technical Committees were published as ISO Recommendations; these documents are now in the process of being transformed into International Standards. As part of this process, International Standard ISO 1249 replaces ISO Recommendation R 1249-1970 drawn up by Technical Committee ISO/TC 35, *Paints and varnishes*.

The Member Bodies of the following countries approved the Recommendation :

Australia	Ireland	Spain
Austria	Israel	Sweden
Denmark	Italy	Switzerland
Egypt, Arab Rep. of	Netherlands	Turkey
Germany	Peru	United Kingdom
Greece	Poland	U.S.S.R.
India	Portugal	
Iran	South Africa, Rep. of	

The Member Body of the following country expressed disapproval of the Recommendation on technical grounds :

France

The Netherlands Member Body had opposed the approval of clause 4.5.4 of the Recommendation.*

* Subsequently, this Member Body approved the Recommendation.
