Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 754 was developed by Technical Committee ISO/TC 47, *Chemistry*. It results from the combination into one single document of draft International Standard ISO/DIS 754 parts 1 to 10, which were submitted to member bodies in January 1981.

It has been approved by the member bodies of the following countries :

Australia*	Germany, F. R.	Poland
Austria	Hungary	Portugal
Belgium	India	Romania
Brazil	Italy	South Africa, Rep. of
China	Korea, Dem. P. Rep. of	Switzerland
Czechoslovakia	Korea, Rep. of***	Thailand
Egypt, Arab Rep. of	Mexico	United Kingdom
France**	Philippines	USSR

This International Standard has also been approved by the International Union of Pure and Applied Chemistry (IUPAC).

It cancels and replaces ISO Recommendation R 754-1968, of which it constitutes a technical revision.

* Australia disapproved clauses 9 and 13 (formerly parts 2 and 6).

** France disapproved clause 9 (formerly part 2).

*** The Republic of Korea did not vote on clause 16 (formerly part 9).
