

Wrought copper and copper alloys — Round tubes for general purposes — Mechanical properties

Cuivre et alliages de cuivre corroyés — Tubes ronds pour usages généraux

First edition — 1974-11-01

UDC 669.3-462 : 539.3/.6

Ref. No. ISO 1635-1974 (E)

Descriptors : copper, copper alloys, wrought products, metal tubes, mechanical properties.

FOREWORD

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO Member Bodies). The work of developing International Standards is carried out through ISO Technical Committees. Every Member Body interested in a subject for which a Technical Committee has been set up has the right to be represented on that Committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the Technical Committees are circulated to the Member Bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 1635 was drawn up by Technical Committee ISO/TC 26, *Copper and copper alloys*, and circulated to the Member Bodies in December 1971.

It has been approved by the Member Bodies of the following countries :

Australia	Hungary	South Africa, Rep. of
Austria	India	Spain
Belgium	Italy	Sweden
Canada	Japan	Switzerland
Chile	Korea, Rep. of	Thailand
Czechoslovakia	Netherlands	Turkey
Denmark	New Zealand	United Kingdom
Egypt, Arab Rep. of	Norway	U.S.A.
Finland	Portugal	U.S.S.R.
France	Romania	

The Member Body of the following country expressed disapproval of the document on technical grounds :

Germany
