
**Resistance welding — Welding current
measurement for resistance welding —**

Part 2:

**Welding current meter with current
sensing coil**

*Soudage par résistance — Mesurage des courants en soudage par
résistance —*

Partie 2: Ampèremètre avec tore de mesure de courant

8 Marking	8
Annex A (normative) Definition of indicated measuring time and its indicated current value	9
A.1 Indicated measuring time	9
A.2 Welding current value for the indicated measuring time	10
Annex B (informative) Set-up of a current sensing coil and construction of welding current meters	11

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of technical committees is to prepare International Standards. Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

ISO 17657-2 was prepared by Technical Committee ISO/TC 44, *Welding and allied processes*, Subcommittee SC 6, *Resistance welding*.

ISO 17657 consists of the following parts, under the general title *Resistance welding — Welding current measurement for resistance welding*:

- *Part 1: Guidelines for measurement*
- *Part 2: Welding current meter with current sensing coil*
- *Part 3: Current sensing coil*
- *Part 4: Calibration system*
- *Part 5: Verification of welding current measuring system*

Introduction

Requests for official interpretations of any aspect of this part of ISO 17657 should be directed to the Secretariat of ISO/TC 44/SC 6 via your national standards body. A complete listing of these bodies can be found at <http://www.iso.org>.
