Copper alloys — Determination of nickel (low contents) — Dimethylglyoxime spectrophotometric method

Alliages de cuivre — Dosage du nickel (faibles teneurs) — Méthode spectrophotométrique à la diméthylglyoxime

First edition — 1976-11-15

ISO 1810-1976 (E)

UDC 669.3 : 546.74 : 543.42

Ref. No. ISO 1810-1976 (E)

Descriptors : copper alloys, chemical analysis, determination of content, nickel, spectrophotometric analysis.

FOREWORD

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

Prior to 1972, the results of the work of the technical committees were published as ISO Recommendations; these documents are in the process of being transformed into International Standards. As part of this process, Technical Committee ISO/TC 26, *Copper and copper alloys*, has reviewed ISO Recommendation R 1810-1971 and found it technically suitable for transformation. International Standard ISO 1810 therefore replaces ISO Recommendation R 1810-1971, to which it is technically identical.

ISO Recommendation R 1810 had been approved by the member bodies of the following countries :

Australia	Greece	Peru
Belgium	Hungary	Poland
Brazil	India	South Africa, Rep. of
Canada	Iran	Spain
Chile	Israel	Sweden
Czechoslovakia	Italy	Switzerland
Egypt, Arab Rep. of	Korea, Rep. of	Turkey
Finland	Netherlands	United Kingdom
France	New Zealand	U.S.A.
Germany	Norway	Yugoslavia

No member body had expressed disapproval of the Recommendation.

The member bodies of the following countries disapproved the transformation of the Recommendation into an International Standard :

Hungary
Italy
