Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 1839 was developed by Technical Committee ISO/TC 34, *Agricultural food products*. It is the result of the combination into one single document of the revision of International Standards ISO 1839/1-1975 and 1839/2-1976 and draft International Standard ISO/DIS 1839/3, which was submitted to member bodies in February 1977, and which was approved by the member bodies of the following countries :
