Commercial refrigerated cabinets — Methods of test — Part I : Calculation of linear dimensions, areas and volumes

Meubles frigorifiques commerciaux — Méthodes d'essai — Partie I : Détermination des dimensions linéaires des surfaces et des volumes

First edition — 1974-06-15

UDC 621.565.92.001.4 : 659.157

Ref. No. ISO 1992/I-1974 (E)

Descriptors : refrigerators, dimensional measurement, specifications.

FOREWORD

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO Member Bodies). The work of developing International Standards is carried out through ISO Technical Committees. Every Member Body interested in a subject for which a Technical Committee has been set up has the right to be represented on that Committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the Technical Committees are circulated to the Member Bodies for approval before their acceptance as International Standards by the ISO Council.

Prior to 1972, the results of the work of the Technical Committees were published as ISO Recommendations; these documents are now in the process of being transformed into International Standards. As part of this process, Technical Committee ISO/TC 86 has reviewed ISO Recommendation R 1992 and found it suitable for transformation. International Standard ISO 1992/I therefore replaces ISO Recommendation R 1992-1971.

ISO Recommendation R 1992 was approved by the Member Bodies of the following countries :

Australia	Greece	Poland
Belgium	Hungary	South Africa, Rep. of
Chile	Israel	Spain
Czechoslovakia	Italy	Sweden
Egypt, Arab Rep. of	Japan	Switzerland
France	Netherlands	United Kingdom
Germany	New Zealand	U.S.S.R.

No Member Body expressed disapproval of the Recommendation.

No Member Body disapproved the transformation of ISO/R 1992 into an International Standard.

Other Parts in this series under the general title, *Commercial refrigerated cabinets – Methods of test*, are as follows :

- *Part II : General test conditions.*
- *Part III : Temperature test.*
- *Part IV : Defrosting test.*
- *Part V : Water vapour condensation test.*
- *Part VI : Electrical energy consumption test.*
- *Part VII : Test for odour of material.*

(The last document is at present at the stage of draft.)
