Wood for manufacture of wood flooring — Symbols for marking according to species

Bois pour la fabrication des parquets — Symboles pour marquage selon les espèces

First edition — 1976-03-01

FOREWORD

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO Member Bodies). The work of developing International Standards is carried out through ISO Technical Committees. Every Member Body interested in a subject for which a Technical Committee has been set up has the right to be represented on that Committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the Technical Committees are circulated to the Member Bodies for approval before their acceptance as International Standards by the ISO Council.

Prior to 1972, the results of the work of the Technical Committees were published as ISO Recommendations; these documents are now in the process of being transformed into International Standards. As part of this process, Technical Committee ISO/TC 99 has reviewed ISO Recommendation R 2036 and found it technically suitable for transformation. International Standard ISO 2036 therefore replaces ISO Recommendation R 2036-1971 to which it is technically identical.

ISO Recommendation R 2036 was approved by the Member Bodies of the following countries :

Belgium	Hungary	Romania
Czechoslovakia	Iran	Spain
Egypt, Arab Rep. of	Italy	Turkey
France	Norway	U.S.S.R.
Greece	Peru	Yugoslavia

The Member Bodies of the following countries expressed disapproval of the Recommendation on technical grounds :

Germany
New Zealand
South Africa, Rep. of

The Member Bodies of the following countries disapproved the transformation of ISO/R 2036 into an International Standard :

Austria
Germany
