

International
Standard

ISO 22073-1

Gas welding equipment —

Part 1:

Line pressure regulators and line pressure regulators with flow-metering devices for gas distribution pipelines up to 6 MPa (60 bar)

Matériel de soudage au gaz —

*Partie 1: Détendeurs de canalisation et détendeurs de
canalisation à débitmètre intégré pour les canalisations de
distribution du gaz jusqu'à 6 MPa (60 bar)*

**First edition
2024-11**

Foreword	v
1 Scope	1
2 Normative references	1
3 Terms and definitions	2
4 Symbols and abbreviated terms	2
5 Design requirements	3
5.1 Materials	3
5.2 Design and construction	3
5.2.1 Oxygen pressure regulators	3
5.2.2 Acetylene pressure regulators	3
5.2.3 Connections	3
5.2.4 Filter	3
5.2.5 Pressure-adjusting device	4
5.2.6 Flow-control valve	4
5.2.7 Pressure gauges	4
5.2.8 Pressure relief valve	4
5.2.9 Leakage	4
5.2.10 Mechanical resistance	4
6 Operating characteristics	5
6.1 Operating-temperature range	5
6.2 Coefficient of pressure increase upon closure R (applicable for line pressure regulators without flow-metering devices)	5
6.3 Accuracy classification (applicable for line pressure regulators with flow-metering devices)	5
7 Marking	5
7.1 Line pressure regulators without flow-metering devices	5
7.2 Line pressure regulators with flow-metering devices	6
8 Instructions for use	6
9 Type-test procedure	6
9.1 General	6
9.2 Test samples and necessary documents	7
9.3 Test conditions	7
9.3.1 General characteristics of the test installation	7
9.3.2 Test gas	7
9.3.3 Accuracy of a flow-metering device	8
9.3.4 Pressure measurement	8
9.4 Units	8
9.4.1 Pressure	8
9.4.2 Flow	8
9.4.3 Temperature	8
9.5 Test for performance and operating characteristics of pressure regulators without flow-metering devices	8
9.5.1 General	8
9.5.2 Nominal discharge Q_n	9
9.5.3 Coefficient of pressure increase upon closure, R	9
9.6 Test for accuracy classification of pressure regulators with flow-metering devices	9
9.7 Tests for mechanical resistance of pressure regulators or pressure regulators with flow-metering devices	10
9.7.1 General	10
9.7.2 Test for mechanical resistance to internal pressure	10
9.7.3 Leakage tests	10
9.7.4 Oxygen pressure surge test	11

9.7.5	Acetylene decomposition test.....	12
9.8	Test for durability of markings.....	12

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO document should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

ISO draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). ISO takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, ISO had not received notice of (a) patent(s) which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at www.iso.org/patents. ISO shall not be held responsible for identifying any or all such patent rights.

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 44, *Welding and allied processes*, Subcommittee SC 8, *Equipment for gas welding, cutting and allied processes*.

A list of all parts in the ISO 22073 series can be found on the ISO website.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html. Official interpretations of ISO/TC 44 documents, where they exist, are available from this page: <https://committee.iso.org/sites/tc44/home/interpretation.html>.
