UDC 621.873/.877 : 62-18

Ref. No. ISO 2374-1983 (E)

Descriptors: lifting equipment, cranes (hoists), ratings, nominal capacity.

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been authorized has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard 2374 was developed by Technical Committee ISO/TC 96, *Cranes, lifting appliances and related equipment*, and was circulated to the member bodies in February 1983.

It has been approved by the member bodies of the following countries:

Australia	Finland	Netherlands
Austria	France	Norway
Belgium	Germany, F.R.	Poland
Brazil	India	United Kingdom
China	Israel	USSR
Czechoslovakia	Italy	
Egypt, Arab Rep. of	Korea, Dem. P. Rep. of	

No member body expressed disapproval of the document.
