Sodium hydrogen carbonate for industrial use — Determination of iron content — 1,10-phenanthroline photometric method

First edition — 1973-04-15

APR 19 1973

Internal Doc Sect

UDC 661.833.623 : 546.72 : 543.42

Ref. No. ISO 2460-1973 (E)

Descriptors : sodium carbonates, chemical analysis, determination of content, iron, photometry.

FOREWORD

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO Member Bodies). The work of developing International Standards is carried out through ISO Technical Committees. Every Member Body interested in a subject for which a Technical Committee has been set up has the right to be represented on that Committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the Technical Committees are circulated to the Member Bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 2460 was drawn up by Technical Committee ISO/TC 47, *Chemistry*, and circulated to the Member Bodies in September 1971.

It has been approved by the Member Bodies of the following countries :

Austria	Hungary	Poland
Belgium	India	Romania
Chile	Ireland	South Africa, Rep. of
Czechoslovakia	Israel	Switzerland
Egypt, Arab Rep. of	Italy	United Kingdom
France	Netherlands	U.S.S.R.
Germany	New Zealand	

No Member Body expressed disapproval of the document.
