Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 2632/III was developed by Technical Committee ISO/TC 57, *Metrology and properties of surfaces*, and was circulated to the member bodies in March 1978.

It has been approved by the member bodies of the following countries :

Australia	France	Romania
Austria	Germany, F. R.	South Africa, Rep. of
Belgium	Hungary	Spain
Brazil	Japan	Switzerland
Bulgaria	Mexico	Turkey
Canada	Netherlands	USA
Chile	New Zealand	USSR
Czechoslovakia	Poland	Yugoslavia

The member bodies of the following countries expressed disapproval of the document on technical grounds :

Sweden
United Kingdom
