Test conditions for pillar type vertical drilling machines — Testing of the accuracy — Part II : Practical test

First edition — 1973-12-15

UDC 621.952-187

Ref. No. ISO 2773/II-1973 (E)

Descriptors : machine tools, drilling machines (tools), tests, accuracy, inspection.

FOREWORD

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO Member Bodies). The work of developing International Standards is carried out through ISO Technical Committees. Every Member Body interested in a subject for which a Technical Committee has been set up has the right to be represented on that Committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the Technical Committees are circulated to the Member Bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 2773/II (originally Draft International Standard ISO/DIS 3032) was drawn up by Technical Committee ISO/TC 39, *Machine tools*, and circulated to the Member Bodies in January 1973.

It has been approved by the Member Bodies of the following countries :

Austria	India	Sweden
Belgium	Italy	Switzerland
Bulgaria	Japan	Thailand
Czechoslovakia	New Zealand	Turkey
France	Poland	United Kingdom
Germany	Romania	U.S.A.
Hungary	South Africa, Rep. of	

No Member Body expressed disapproval of the document.

Test conditions for pillar type vertical drilling machines — Testing of the accuracy — Part II : Practical test

1 SCOPE AND FIELD OF APPLICATION

This International Standard specifies the practical test to be carried out for checking pillar type vertical drilling machines and is a continuation of ISO 2773/I, *Test conditions for pillar type vertical drilling machines — Testing of the accuracy — Part I : Geometrical tests*.
