Copper and copper alloys — Determination of lead — Extracting titration method

Cuivre et alliages de cuivre — Dosage du plomb — Méthode de titrage par extraction

First edition — 1975-07-15

UDC 669.3 : 546.815

Ref. No. ISO 3112-1975 (E)

Descriptors : copper, copper alloys, lead-containing alloys, chemical analysis, determination of content, lead (metal), extraction analysis.

FOREWORD

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO Member Bodies). The work of developing International Standards is carried out through ISO Technical Committees. Every Member Body interested in a subject for which a Technical Committee has been set up has the right to be represented on that Committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the Technical Committees are circulated to the Member Bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 3112 was drawn up by Technical Committee ISO/TC 26, *Copper and copper alloys*, and circulated to the Member Bodies in April 1973.

It has been approved by the Member Bodies of the following countries :

Austria	France	Poland
Belgium	Germany	South Africa, Rep. of
Brazil	India	Sweden
Bulgaria	Iran	Switzerland
Canada	Italy	Thailand
Chile	Japan	Turkey
Egypt, Arab Rep. of	Mexico	U.S.A.
Finland	Norway	U.S.S.R.

The Member Body of the following country expressed disapproval of the document on technical grounds :

United Kingdom
