

Fluid power systems and components — Cylinder bores and piston rod diameters — Inch series

Transmissions hydrauliques et pneumatiques — Alésages des vérins et diamètres des tiges de piston — Série en inches

First edition — 1975-11-01

FOREWORD

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO Member Bodies). The work of developing International Standards is carried out through ISO Technical Committees. Every Member Body interested in a subject for which a Technical Committee has been set up has the right to be represented on that Committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the Technical Committees are circulated to the Member Bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 3321 was drawn up by Technical Committee ISO/TC 131, *Fluid power systems and components*, and circulated to the Member Bodies in December 1973.

It has been approved by the Member Bodies of the following countries :

Australia	Germany	Spain
Austria	India	Switzerland
Belgium	Italy	Thailand
Brazil	Japan	United Kingdom
Czechoslovakia	New Zealand	U.S.A.
Finland	South Africa, Rep. of	Yugoslavia

The Member Bodies of the following countries expressed disapproval of the document on technical grounds :

Ireland
Poland
Sweden
U.S.S.R.
