Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been authorized has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 364 was developed by Technical Committee ISO/TC 72, *Textile machinery and allied machinery and accessories*, and was circulated to the member bodies in November 1981.

It has been approved by the member bodies of the following countries:

Australia	France	South Africa, Rep. of
Belgium	Germany, F.R.	Spain
Brazil	India	Switzerland
Bulgaria	Ireland	Turkey
China	Japan	United Kingdom
Czechoslovakia	Korea, Rep. of	USSR
Egypt, Arab Rep. of	Romania	Yugoslavia

The member body of the following country expressed disapproval of the document on technical grounds:

Poland

This International Standard cancels and replaces ISO Recommendation R 364-1967, of which it constitutes a technical revision.
