Zinc alloy ingots — Selection and preparation of samples for chemical analysis

Alliages de zinc en lingots — Prélèvement et préparation des échantillons pour l'analyse chimique

First edition — 1976-09-30

FOREWORD

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO Member Bodies). The work of developing International Standards is carried out through ISO Technical Committees. Every Member Body interested in a subject for which a Technical Committee has been set up has the right to be represented on that Committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the Technical Committees are circulated to the Member Bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 3752 was drawn up by Technical Committee ISO/TC 18, *Zinc and zinc alloys*, and was circulated to the Member Bodies in June 1975.

It has been approved by the Member Bodies of the following countries :

Australia	France	Poland
Austria	Germany	Romania
Belgium	India	South Africa, Rep. of
Brazil	Ireland	Spain
Bulgaria	Italy	Turkey
Canada*	Japan	United Kingdom
Czechoslovakia	Mexico	U.S.S.R.
Egypt, Arab Rep. of	Norway	Yugoslavia

* Canada approved the International Standard with the exception of clause 4.

No Member Body expressed disapproval of the document.
