Shipbuilding — Co-ordination of dimensions in ships' accommodation — Part 5 : Co-ordinating sizes for key components

Construction navale — Coordination dimensionnelle pour l'ameublement des navires — Partie 5 : Dimensions de coordination pour les composants clés

First edition — 1979-08-15

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 3827/5 was developed by Technical Committee ISO/TC 8, *Shipbuilding*, and was circulated to the member bodies in August 1978.

It has been approved by the member bodies of the following countries :

Australia	Ireland	Romania
Belgium	Italy	Spain
Brazil	Japan	Sweden
Bulgaria	Korea, Dem. P. Rep. of	Turkey
Czechoslovakia	Korea, Rep. of	United Kingdom
Finland	Mexico	USSR
France	Netherlands	Yugoslavia
India	Norway	

The member body of the following country expressed disapproval of the document on technical grounds :

Germany, F. R.
