Concrete — Classification by compressive strength

Béton — Classification selon la résistance à la compression

First edition — 1977-07-01

FOREWORD

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 3893 was developed by Technical Committee ISO/TC 71, *Concrete, reinforced concrete and pre-stressed concrete*, and was circulated to the member bodies in July 1975.

It has been approved by the member bodies of the following countries :

Australia	Italy	Spain
Austria	Mexico	Switzerland
Bulgaria	Netherlands	Turkey
Canada	Norway	United Kingdom
Chile	Poland	U.S.A.
Czechoslovakia	Portugal	U.S.S.R.
Germany	Romania	
India	South Africa, Rep. of	

The member bodies of the following countries expressed disapproval of the document on technical grounds :

Belgium	Israel
Denmark	Sweden
France
