Ref. No. ISO 4051-1977 (E)

Descriptors : shipbuilding, inland navigation, steering control devices, servomotors, torque.

FOREWORD

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 4051 was developed by Technical Committee ISO/TC 8, *Shipbuilding*, and was circulated to the member bodies in June 1976.

It has been approved by the member bodies of the following countries :

Austria	Hungary	Poland
Belgium	India	Romania
Brazil	Ireland	United Kingdom
Chile	Italy	U.S.S.R.
Czechoslovakia	Mexico	Yugoslavia
France	Netherlands	
Germany	Philippines	

No member body expressed disapproval of the document.
