Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 4050/2 was developed by Technical Committee ISO/TC 8, *Shipbuilding*, and was circulated to the member bodies in November 1978.

It has been approved by the member bodies of the following countries :

Austria	France	Korea, Rep. of
Belgium	India	Poland
Bulgaria	Ireland	Romania
Chile	Italy	Turkey
China	Japan	USSR
Czechoslovakia	Korea, Dem. P. Rep. of	Yugoslavia

The member bodies of the following countries expressed disapproval of the document on technical grounds :

Germany, F. R.
United Kingdom

Shipbuilding — Inland vessels — Anchors — Part 2 : Matrosov anchors

1 Scope and field of application

This International Standard specifies the main characteristics of Matrosov anchors used in vessels for inland waterways.

2 Classification

Depending on the method of manufacture, Matrosov anchors fall into two types :

A — cast steel;

B — welded.

3 Dimensions and technical requirements

The main dimensions and technical characteristics of Matrosov anchors are given in figures 1 and 2 and in tables 1 and 2.
