Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

International Standard ISO 4074-3 was prepared by Technical Committee ISO/TC 157, *Mechanical contraceptives*.

This second edition cancels and replaces the first edition (ISO 4074-3:1980) of which it constitutes a technical revision.

ISO 4074 consists of the following parts, under the general title *Rubber condoms*:

- Part 1: *Requirements*
- Part 2: *Determination of length*
- Part 3: *Determination of width*
- Part 4: *Determination of colour fastness*
- Part 5: *Testing for holes — Water leak test*
- Part 6: *Determination of bursting volume and pressure*
- Part 7: *Oven conditioning*
- Part 9: *Determination of tensile properties*
- Part 10: *Packaging and labelling — Condoms in consumer packages*
