Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 4074/4 was developed by Technical Committee ISO/TC 157, *Mechanical contraceptives*, and was circulated to the member bodies in January 1979.

It has been approved by the member bodies of the following countries :

Canada	Mexico	Thailand
Czechoslovakia	Netherlands	Turkey
Denmark	Poland	United Kingdom
France	Romania	USA
India	South Africa, Rep. of	USSR
Korea, Rep. of	Sweden	

The member body of the following country expressed disapproval of the document on technical grounds :

Australia
