Concrete — Determination of tensile splitting strength of test specimens

Béton — Détermination de la résistance à la traction par fendage des éprouvettes

First edition — 1980-02-15

UDC 691.32 : 620.17

Ref. No. ISO 4108-1980 (E)

Descriptors : concrete, hardened concrete, compression tests, tensile strength.

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 4108 was developed by Technical Committee ISO/TC 71, *Concrete, reinforced concrete and pre-stressed concrete*, and was circulated to the member bodies in May 1977.

It has been approved by the member bodies of the following countries :

Australia	Greece	Portugal
Austria	Hungary	Romania
Brazil	India	South Africa, Rep. of
Bulgaria	Israel	Spain
Canada	Italy	Turkey
Czechoslovakia	Mexico	United Kingdom
Denmark	Netherlands	USSR
Egypt, Arab Rep. of	New Zealand	Yugoslavia
France	Norway	
Germany, F. R.	Poland	

The member body of the following country expressed disapproval of the document on technical grounds :

Belgium
