Aircraft — Fuel nozzle grounding plugs and sockets

First edition — 1973-06-01

UDC 629.7.082.6 : 621.316.99

Ref. No. ISO 46-1973 (E)

Descriptors : aircraft, aircraft equipment, refuelling, hose nozzles, electrical grounding, connector plugs.

FOREWORD

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO Member Bodies). The work of developing International Standards is carried out through ISO Technical Committees. Every Member Body interested in a subject for which a Technical Committee has been set up has the right to be represented on that Committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the Technical Committees are circulated to the Member Bodies for approval before their acceptance as International Standards by the ISO Council.

Prior to 1972, the results of the work of the Technical Committees were published as ISO Recommendations; these documents are now in the process of being transformed into International Standards. As part of this process, International Standard ISO 46 replaces ISO Recommendation R 46-1970 drawn up by Technical Committee ISO/TC 20, *Aircraft and space vehicles*.

The Member Bodies of the following countries approved the Recommendation :

Australia	Israel	Thailand
Belgium	Italy	Turkey
Canada	Netherlands	United Kingdom
Czechoslovakia	New Zealand	U.S.S.R.
Egypt, Arab Rep. of	Portugal	Yugoslavia
France	Spain	
Germany	Switzerland	

No Member Body expressed disapproval of the Recommendation.
