FOREWORD

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 4746 was developed by Technical Committee ISO/TC 26, *Copper and copper alloys*, and was circulated to the member bodies in January 1976.

It has been approved by the member bodies of the following countries :

Belgium	Korea, Dem. P. Rep. of	Switzerland
Brazil	Mexico	Turkey
Chile	Netherlands	United Kingdom
France	Norway	U.S.A.
Hungary	Portugal	U.S.S.R.
India	Romania	Yugoslavia
Italy	South Africa, Rep. of	
Japan	Sweden	

No member body expressed disapproval of the document.
