
International Standard

5066/2

INTERNATIONAL ORGANIZATION FOR STANDARDIZATION • МЕЖДУНАРОДНАЯ ОРГАНИЗАЦИЯ ПО СТАНДАРТИЗАЦИИ • ORGANISATION INTERNATIONALE DE NORMALISATION

Aircraft — Hermetically sealed monostable electrical relays, 2A and 3A — Part 2 : Type approval tests

Aéronefs — Relais électriques hermétiques monostables 2A et 3A — Partie 2 : Essais d'approbation de type

First edition — 1986-11-15

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council. They are approved in accordance with ISO procedures requiring at least 75 % approval by the member bodies voting.

International Standard ISO 5066/2 was prepared by Technical Committee ISO/TC 20, *Aircraft and space vehicles*.

Users should note that all International Standards undergo revision from time to time and that any reference made herein to any other International Standard implies its latest edition, unless otherwise stated.

Contents

	Page
0 Introduction	1
1 Scope and field of application	1
2 References	1
3 Sampling, order of tests and test conditions	1
4 Preliminary checks	1
4.1 Appearance	1
4.2 Marking	1
4.3 Mass	1
4.4 Dimensions	1
5 Type approval tests	1
5.1 Test No. 1 : Resistance voltage	1
5.2 Test No. 2 : Insulation resistance	2
5.3 Test No. 3 : Coil resistance	2
5.4 Test No. 4 : Contact resistance	2
5.5 Test No. 5 : Pick-up and drop-out voltages	2
5.6 Test No. 6 : Make and break times	2
5.7 Test No. 7 : Contact bounce times	2
5.8 Test No. 8 : Endurance	3
5.9 Test No. 9 : Overload	3
5.10 Test No. 10 : Internal moisture content	3
5.11 Test No. 11 : Hermetic seal	3
5.12 Test No. 12 : Rapid variations in temperature	4
5.13 Test No. 13 : Humidity	4
5.14 Test No. 14 : Salt spray	4
5.15 Test No. 15 : Shock	4

5.16	Test No. 16 : Sinusoidal vibrations	5
5.17	Test No. 17 : Acceleration	5
5.18	Test No. 18 : Solderability (bath method)	5
5.19	Test No. 19 : Strength of outlets (tensile test)	5
5.20	Test No. 20 : Magnetic interference	5
Annex : Standard circuit for measuring characteristics of time and examples of traces on the screen of an oscilloscope during time measurements		7
