Part-turn valve actuator attachment — Part 3 : Dimensions of driving components

Raccordement des servomoteurs à fraction de tour aux appareils de robinetterie — Partie 3 : Dimensions des éléments d'entraînement

First edition — 1982-06-01

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 5211/3 was developed by Technical Committee ISO/TC 153, *Valves*, and was circulated to the member bodies in May 1981.

It has been approved by the member bodies of the following countries :

Australia	France	Romania
Austria	Germany, R.F.	Sri Lanka
Belgium	India	Sweden
Brazil	Japan	Switzerland
Canada	Korea, Rep. of	United Kingdom
Egypt, Arab Rep. of	Netherlands	USA
Finland	Norway	

The member bodies of the following countries expressed disapproval of the document on technical grounds :

Czechoslovakia
USSR
