Aircraft — General purpose push-pull single-pole circuit-breakers — Dimensions

Aéronefs — Disjoncteurs unipolaires à bouton-poussoir d'usage courant — Dimensions

First edition — 1975-02-15

FOREWORD

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO Member Bodies). The work of developing International Standards is carried out through ISO Technical Committees. Every Member Body interested in a subject for which a Technical Committee has been set up has the right to be represented on that Committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the Technical Committees are circulated to the Member Bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 530 was drawn by Technical Committee ISO/TC 20, *Aircraft and space vehicles*.

It was submitted directly to the ISO Council, in accordance with clause 6.12.1 of the Directives for the technical work of ISO.

This International Standard cancels and replaces ISO Recommendation R 530-1966, which had been approved by the Member Bodies of the following countries :

Argentina	France	Spain
Belgium	Germany	Sweden
Canada	Israel	Switzerland
Chile	Italy	Turkey
Czechoslovakia	Japan	United Kingdom
Egypt, Arab Rep. of	Netherlands	U.S.S.R.

No Member Body had expressed disapproval of the document.
