Ferrosilicochromium — Specification and conditions of delivery

Ferro-silico-chrome — Spécifications et conditions de livraison

First edition — 1980-12-15

UDC 669.15'26'782-198

Ref. No. ISO 5449-1980 (E)

Descriptors : ferroalloys, ferrosilicon, ferrochromium, materials specifications, chemical composition, delivery, quality control, grain size.

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 5449 was developed by Technical Committee ISO/TC 132, *Ferroalloys*, and was circulated to the member bodies in November 1979.

It has been approved by the member bodies of the following countries :

Australia	Germany, F.R.	Portugal
Austria	India	Romania
Brazil	Italy	South Africa, Rep. of
Bulgaria	Japan	Sweden
Canada	Libyan Arab Jamahiriya	United Kingdom
China	Norway	USSR
Czechoslovakia	Pakistan	Yugoslavia
France	Poland	

The member body of the following country expressed disapproval of the document on technical grounds :

USA
