Cryolite, natural and artificial, and aluminium fluoride for industrial use — Determination of sulphur content — X-ray fluorescence spectrometric method

Cryolithe, naturelle et artificielle, et fluorure d'aluminium à usage industriel — Dosage du soufre — Méthode par spectrométrie de fluorescence X

First edition — 1979-07-15

JUL 27 1979

UDC 553.634 + 661.862.36 : 543.845

Ref. No. ISO 5938-1979 (E)

Descriptors : cryolite, aluminium fluoride, chemical analysis, determination of content, sulphur, X-ray analysis, spectrophotometric analysis, atomic fluorescence spectrometry.

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard 5938 was developed by Technical Committee ISO/TC 47, *Chemistry*, and was circulated to the member bodies in September 1977.

It has been approved by the member bodies of the following countries :

Austria	Hungary	Romania
Belgium	India	South Africa, Rep. of
Brazil	Israel	Sweden
Bulgaria	Italy	Switzerland
Czechoslovakia	Kenya	Turkey
Egypt, Arab Rep. of	Netherlands	USA
France	New Zealand	USSR
Germany, F. R.	Portugal	Yugoslavia

The member body of the following country expressed disapproval of the document on technical grounds :

United Kingdom
