Sodium hexafluorosilicate for industrial use — Determination of free silica content — Gravimetric method

Hexafluorosilicate de sodium à usage industriel — Dosage de la silice libre — Méthode gravimétrique

First edition — 1980-07-15

AUG 0 1 1980

UDC 661.833.66 : 543.21 : 546.284-31

Ref. No. ISO 6229-1980 (E)

Descriptors : chemical analysis, determination of content, silicon dioxide, gravimetric analysis.

FOREWORD

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 6229 was developed by Technical Committee ISO/TC 47, *Chemistry*, and was circulated to the member bodies in October 1978.

It has been approved by the member bodies of the following countries :

Australia	Germany, F.R.	Philippines
Austria	Hungary	Poland
Belgium	India	Romania
Bulgaria	Israel	South Africa, Rep. of
China	Italy	Switzerland
Czechoslovakia	Korea, Rep. of	United Kingdom
Egypt, Arab Rep. of	Mexico	USSR
France	Netherlands	Yugoslavia

No member body expressed disapproval of the document.

This International Standard has also been approved by the International Union of Pure and Applied Chemistry (IUPAC).
