Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 6410 was developed by Technical Committee ISO/TC 10, *Technical drawings*, and was circulated to the member bodies in April 1980.

It has been approved by the member bodies of the following countries :

Australia	Finland	Norway
Austria	France	Poland
Belgium	Germany, F. R.	Romania
Brazil	Greece	South Africa, Rep. of
Canada	India	Spain
China	Italy	Sweden
Czechoslovakia	Korea, Rep. of	Switzerland
Denmark	Mexico	United Kingdom
Egypt, Arab Rep. of	Netherlands	USSR

The member bodies of the following countries expressed disapproval of the document on technical grounds :

Japan
USA

This International Standard cancels and replaces section 5 of ISO Recommendation R 128-1959 of which it constitutes a technical revision.
