## Woodworking machines — Diameters of spindles for receiving circular sawblades

*Machines à bois — Diamètres des broches portant des lames de scies circulaires*

First edition — 1981-07-15

---

UDC 674.053 : 621.934

Ref. No. ISO 7006-1981 (E)

**Descriptors** : machine tools, woodworking machinery, machine elements, spindles, diameters.

## Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 7006 was developed by Technical Committee ISO/TC 39, *Machine tools*, and was circulated to the member bodies in June 1980.

It has been approved by the member bodies of the following countries :

|                |                |                       |
|----------------|----------------|-----------------------|
| Belgium        | Hungary        | Romania               |
| Bulgaria       | India          | South Africa, Rep. of |
| Chile          | Italy          | Spain                 |
| Czechoslovakia | Japan          | Sweden                |
| France         | Korea, Rep. of | United Kingdom        |
| Germany, F. R. | Poland         |                       |

No member body expressed disapproval of the document.
