Ref. No. ISO 727-1979 (E)

Descriptors : plastic pipes, unplasticized polyvinyl chloride, pressure pipes, pipe fittings, sockets, dimensions

FOREWORD

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 727 was developed by Technical Committee ISO/TC 138, *Plastics pipes, fittings and valves for the transport of fluids*. The second edition (ISO 727-1975) had been approved by the member bodies of the following countries :

Austria	India	Romania
Belgium	Ireland	South Africa, Rep. of
Chile	Israel	Spain
Czechoslovakia	Italy	Sweden
Denmark	Netherlands	Switzerland
Finland	Norway	United Kingdom
France	Poland	USA
Germany, F.R.	Portugal	

No member body had expressed disapproval of the document.

This third edition, which supersedes ISO 727-1975, incorporates draft Amendment 1, which was submitted directly to the ISO Council, in accordance with clause 5.10.1 of the Directives for the technical work of ISO.
