Second edition
1997-12-15

Laryngoscopic fittings —

Part 2:

Miniature electric lamps — Screw threads and sockets for conventional blades

Éléments de laryngoscopes —

Partie 2: Lampes électriques miniatures — Filetages et douilles pour lames conventionnelles

Contents

1 Scope 1

2 Normative references 1

3 Definitions 1

4 Materials 1

5 Electric lamp..... 2

5.1 Metal cap and base contact 2

5.2 Screw thread for lamp 2

6 Sockets 2

6.1 Dimensions and centre contact 2

6.2 Internal screw thread for socket 2

Annex A Bibliography 4

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

This second edition cancels and replaces the first edition (ISO 7376-2:1984), which has been technically revised.

International Standard ISO 7376-2 was prepared by Technical Committee ISO/TC 121, *Anaesthetic and respiratory equipment*, Subcommittee SC 2, *Tracheal tubes and other equipment*.

ISO 7376 consists of the following parts, under the general title *Laryngoscopic fittings*

- *Part 1: Conventional hook-on type handle-blade fittings*
- *Part 2: Miniature electric lamps — Screw threads and sockets for conventional blades*
- *Part 3: Fibre-illuminated re-usable rigid laryngoscopes.*
