Paints and varnishes — Colorimetry — Part 1: Principles

Peintures et vernis — Colorimétrie — Partie 1: Principes

First edition — 1984-10-01

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council. They are approved in accordance with ISO procedures requiring at least 75 % approval by the member bodies voting.

International Standard ISO 7724/1 was prepared by Technical Committee ISO/TC 35, *Paints and varnishes*.

Contents

	Page
0 Introduction	1
1 Scope and field of application	1
2 References	1
3 Colour co-ordinates	1
3.1 Colour co-ordinates in the CIE 1964 supplementary standard colorimetric system	1
3.2 Colour co-ordinates in the CIE 1976 ($L^* a^* b^*$) colour space	2
4 Standard illuminants	4
5 Spectral radiometric characteristics	4
5.1 General	4
