ANSI Internat Doc Sect

Volatile organic liquids for industrial use — Determination of dry residue after evaporation on a water bath — General method

Liquides organiques volatils à usage industriel — Détermination du résidu sec après évaporation sur bain d'eau — Méthode générale

First edition — 1981-09-15

SEP 30 1981

UDC 661.7 : 543.814

Ref. No. ISO 759-1981 (E)

Descriptors : liquids, organic compounds, chemical analysis, determination of content, gravimetric analysis, evaporation analysis, residues.

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 759 was developed by Technical Committee ISO/TC 47, *Chemistry*, and was circulated to the member bodies in December 1979.

It has been approved by the member bodies of the following countries :

Australia	France	Poland
Austria	Germany, F. R.	Portugal
Belgium	Hungary	Romania
Brazil	India	South Africa, Rep. of
Bulgaria	Italy	Switzerland
China	Korea, Rep. of	Thailand
Czechoslovakia	Netherlands	United Kingdom
Egypt, Arab Rep. of	Philippines	USSR

No member body expressed disapproval of the document.

This International Standard cancels and replaces ISO Recommendation R 759-1968, of which it constitutes a technical revision.

This International Standard has also been approved by the International Union of Pure and Applied Chemistry (IUPAC).
