Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 787/5 was developed by Technical Committee ISO/TC 35, *Paints and varnishes*.

It was submitted directly to the ISO Council, in accordance with clause 5.10.1 of part 1 of the Directives for the technical work of ISO. It cancels and replaces Part 5 of ISO Recommendation R 787-1968, which had been approved by the member bodies of the following countries :

Australia	Czechoslovakia	Netherlands
Austria	Egypt, Arab Rep. of	Portugal
Belgium	India	Spain
Brazil	Iran	Switzerland
Canada	Ireland	United Kingdom
Chile	Israel	USSR
Colombia	Japan	Yugoslavia

No member body had expressed disapproval of the document.
