Foreword

ISO (the International Organization for Standardization) and IEC (the International Electrotechnical Commission) form the specialized system for worldwide standardization. National bodies that are members of ISO or IEC participate in the development of International Standards through technical committees established by the respective organization to deal with particular fields of technical activity. ISO and IEC technical committees collaborate in fields of mutual interest. Other international organizations, governmental and non-governmental, in liaison with ISO and IEC, also take part in the work.

In the field of information technology, ISO and IEC have established a joint technical committee, ISO/IEC JTC 1. Draft International Standards adopted by the joint technical committee are circulated to national bodies for voting. Publication as an International Standard requires approval by at least 75 % of the national bodies casting a vote.

Amendment 1 to International Standard ISO 8822 : 1988 was prepared by Joint Technical Committee ISO/IEC JTC 1, *Information technology*.

Introduction to this amendment

This is amendment 1 to ISO 8822 : 1988 covering connectionless-mode Presentation Service.

This amendment defines connectionless-mode Presentation service which may be used by OSI applications for connectionless transmission.

Format and notation

This amendment is written as a "delta document." That is, it will be merged with the base document, ISO 8822 : 1988. Editing instructions are in italic caps and are contained within { }:

{THIS IS AN EXAMPLE OF AN EDITING INSTRUCTION.}

Modifications to original text (i.e. ISO 8822 : 1988) are indicated as deletions (~~this is deleted text~~), and insertions that are italicized and within << >> (<<*This is inserted text.*>>). However, this notation is not used for replaced or inserted text.
