5.2 Responsibilities of a sponsoring authority 4

5.3 Evaluation criteria to be applied by a sponsoring authority 5

6 Issuing organizations (IO) 5

Annex A (informative) Guidance on the use of ISO/IEC 6523 in relationship with ISO/IEC 8824-1 and ISO/IEC 8348 .. 6

Foreword

ISO (the International Organization for Standardization) and IEC (the International Electrotechnical Commission) form the specialized system for worldwide standardization. National bodies that are members of ISO or IEC participate in the development of International Standards through technical committees established by the respective organization to deal with particular fields of technical activity. ISO and IEC technical committees collaborate in fields of mutual interest. Other international organizations, governmental and non-governmental, in liaison with ISO and IEC, also take part in the work.

In the field of information technology, ISO and IEC have established a joint technical committee, ISO/IEC JTC 1. Draft International Standards adopted by the joint technical committee are circulated to national bodies for voting. Publication as an International Standard requires approval by at least 75 % of the national bodies casting a vote.

International Standard ISO/IEC 6523-2 was prepared by Joint Technical Committee ISO/IEC JTC 1, *Information technology*, Subcommittee SC 32, *Data management services*.

This edition, together with ISO/IEC 6523-1:1998, cancels and replaces ISO 6523:1984, which has been technically revised.

ISO/IEC 6523 consists of the following parts, under the general title *Information technology — Structure for the identification of organizations and organization parts*:

- *Part 1: Identification of organization identification schemes*
- *Part 2: Registration of organization identification schemes*

Annex A of this part of ISO/IEC 6523 is for information only.
