Foreword

ISO (the International Organization for Standardization) and IEC (the International Electrotechnical Commission) form the specialized system for worldwide standardization. National bodies that are members of ISO or IEC participate in the development of International Standards through technical committees established by the respective organization to deal with particular fields of technical activity. ISO and IEC technical committees collaborate in fields of mutual interest. Other international organizations, governmental and non-governmental, in liaison with ISO and IEC, also take part in the work.

In the field of information technology, ISO and IEC have established a joint technical committee, ISO/IEC JTC 1. Draft International Standards adopted by the joint technical committee are circulated to national bodies for voting. Publication as an International Standard requires approval by at least 75 % of the national bodies casting a vote.

Amendment 1 to International Standard ISO/IEC 8632-2:1992 was prepared by Joint Technical Committee ISO/IEC JTC 1, *Information technology*, Subcommittee 24, *Computer graphics and image processing*.

Part 2: Character encoding

AMENDMENT 1: Rules for profiles

Page vi
Add to Contents:

"11 Encoding rules, proforma, and Model Profile
11.1 General principles . . . . . .
11.1.1 Encodings . . . . . .
11.1.2 Metafile defaults . . . . . .
11.2 Profile Proforma tables . . . . . "

Clause 10, page 85
Add a new sentence before the first sentence:

"Conformance of metafiles to ISO/IEC 8632 is defined in terms of profiles."

Change the first sentence to read:

"A metafile conforms to this character encoding if it conforms to a profile and meets the following requirements."

Change the first bullet item to read:

"— Each metafile element described in this part is coded in the manner described in this International Standard and a profile."

Add a new clause 11 after page 85

"12 Encoding rules, proforma, and Model Profile

12.1 General principles

12.1.1 Encodings

Precisions are defined consistently with the principles of the encodings, not necessarily for inter-encoding translation. Where both considerations might apply, compatibility with the principles of the encoding are considered first and inter-encoding translation second.
