plusieurs octets —*

Partie 1: Architecture et table multilingue

AMENDEMENT 17: Extension A d'idéogrammes unifiés CJK

Foreword

ISO (the International Organization for Standardization) and IEC (the International Electrotechnical Commission) form the specialized system for worldwide standardization. National bodies that are members of ISO or IEC participate in the development of International Standards through technical committees established by the respective organization to deal with particular fields of technical activity. ISO and IEC technical committees collaborate in fields of mutual interest. Other international organizations, governmental and non-governmental, in liaison with ISO and IEC, also take part in the work.

In the field of information technology, ISO and IEC have established a joint technical committee, ISO/IEC JTC 1. Draft International Standards adopted by the joint technical committee are circulated to national bodies for voting. Publication as an International Standard requires approval by at least 75 % of the national bodies casting a vote.

Amendment 17 to ISO/IEC 10646-1:1993 was prepared by Joint Technical Committee ISO/IEC JTC 1, *Information technology*, Subcommittee SC 2, *Coded character sets*.

Part 1:

Architecture and Basic Multilingual Plane

AMENDMENT 17: CJK Unified Ideographs Extension A

Page 6, Figure 2

In the rectangle marked "I-zone" replace the hexadecimal number "4E" in the top left corner by "34".

Page 7, Clause 8

In paragraph 2 replace the lines:

A-zone: code positions 0000 0000 to 0000 4DFF

I-zone: code positions 0000 4E00 to 0000 9FFF

by

A-zone: code positions 0000 0000 to 0000 33FF

I-zone: code positions 0000 3400 to 0000 9FFF

In the diagram replace:

- "4E" by "34",

- "A-zone (19903 positions)" by
"A-zone (13247 positions)",

- "I-zone (20992 positions)" by
"I-zone (27648 positions)".

Page 11, Clause 19

In the list of Block names, after the entry CJK COMPATIBILITY, insert new entry as follows:

CJK UNIFIED IDEOGRAPHS EXTENSION A
3400 - 4DBF

Page 15, Clause 25, Figure 3

In Figure 3 (see Amendment 5), divide the A-zone horizontally to create a new area corresponding to rows 34 to 4D, and insert in this area the words:

CJK Unified Ideographs Extension A

In Figure 4 (see Amendment 5) delete the part of the figure that extends from row 34 to row 4D.

Page 262, Clause 26

- Replace page 262 with amended page attached here.

- Insert between pages 262 and 263 the 138 pages of tables of ideographs that are attached here.

Page 700, Annex A

In the list of collection number and names, after

80 BRAILLE PATTERNS

insert a new entry as follows:

81 CJK UNIFIED IDEOGRAPHS EXTENSION A
3400 - 4DBF

26 CJK unified ideographs

Detailed code tables for:

- CJK Unified Ideographs Extension A (starting at code position 3400), and
- CJK Unified Ideographs (starting at code position 4E00),

are shown on the following pages.

Entries in the code tables for both CJK (Chinese / Japanese / Korean) Unified Ideographs and its Extension A are arranged as follows.

Row/Cell Hex code	C G- Hanzi		J Kanji	K Hanja	V ChuNom
078/000	—	—	—	—	—
4E00	0-523B 0-5027	1-4421 1-3601	0-306C 0-1676	0-6C69 0-7673	1-2121 1-0101

NOTE - Under each ideograph the two lines of numbers indicate the source code positions; the first line shows hexadecimal values, the second line shows decimal values.

The leftmost column of an entry shows the code position in ISO/IEC 10646, giving the code representation both in decimal and in hexadecimal notation.

Each of the other columns shows the graphic symbol for the character, and its coded representation, as specified in a source standard for character sets that is also identified in the table entry. Each of these source standards is assigned to one of five groups indicated by G, T, J, K, or V as shown in the lists below. In each table entry, a separate column is assigned for the corresponding character (if any) from each of those groups of source standards.

An entry in any of the G, T, J, K, or V columns includes a sample graphic symbol from the source character set standard, together with its coded representation in that standard. The first line below the graphic symbol shows the coded representation in hexadecimal notation. The second line shows the coded representation in decimal notation which comprises two digits for section number followed by two digits for position number. Each of the coded representations is prefixed by a one-character source code identification followed by a hyphen. This source code character identifies the coded character set standard from which the character is taken as shown in the lists below.

Hanzi G sources are

G0 GB2312-80

G1 GB12345-90 with 58 Hong Kong and 92 Korean "Idu" characters

G3 GB7589-87 unsimplified forms

G5 GB7590-87 unsimplified forms

G7 General Purpose Hanzi List for Modern Chinese Language, and General List of Simplified Hanzi

GS Singapore Characters

G8 GB8565-88

GE GB16500-95

Hanzi T sources are

T1 TCA-CNS 11643-1992 1st plane

T2 TCA-CNS 11643-1992 2nd plane

T3 TCA-CNS 11643-1992 3rd plane with some additional characters

T4 TCA-CNS 11643-1992 4th plane

T5 TCA-CNS 11643-1992 5th plane

T6 TCA-CNS 11643-1992 6th plane

T7 TCA-CNS 11643-1992 7th plane

TF TCA-CNS 11643-1992 15th plane

Kanji J sources are

J0 JIS X 0208-1990

J1 JIS X 0212-1990

JA Unified Japanese IT Vendors Contemporary Ideographs, 1993

Hanja K sources are

K0 KS C 5601-1987

K1 KS C 5657-1991

K2 PKS C 5700-1 1994

K3 PKS C 5700-2 1994

ChuNom V sources are

V0 TCVN 5773:1993

V1 TCVN 6056:1995

For CJK (Chinese/Japanese/Korean) Ideographs in the BMP, the names shall be algorithmically constructed by appending their two-octet coded representation in hexadecimal notation to "CJK UNIFIED IDEOGRAPH-". For example, the first CJK ideograph character in the BMP has the name "CJK UNIFIED IDEOGRAPH-3400".
