Foreword

ISO (the International Organization for Standardization) and IEC (the International Electrotechnical Commission) form the specialized system for worldwide standardization. National bodies that are members of ISO or IEC participate in the development of International Standards through technical committees established by the respective organization to deal with particular fields of technical activity. ISO and IEC technical committees collaborate in fields of mutual interest. Other international organizations, governmental and non-governmental, in liaison with ISO and IEC, also take part in the work.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of document should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO and IEC shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents) or the IEC list of patent declarations received (see <http://patents.iec.ch>).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see www.iso.org/iso/foreword.html.

This document was prepared by Joint Technical Committee ISO/IEC JTC 1, *Information technology*, Subcommittee SC 32, *Data management and interchange*.

A list of all parts in the ISO/IEC 11179 series can be found on the ISO website.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.

Information technology — Metadata registries (MDR) —

Part 3: Registry metamodel and basic attributes

AMENDMENT 1

3.1, 3.2

Change all references to "*datatype* (3.1.8)" to "*datatype* (3.1.9)".

3.1.13

Change the reference in the source from "7.3.37" to "7.3.38".

3.2.9

Replace the definition with:

attribute (3.1.4) of a *metadata item* (3.2.75) commonly needed in its specification

3.2.50

Replace the definition with:

metadata item (3.2.75) which can have *designations* (3.2.51) and/or *definitions* (3.2.40)

3.2.75

In NOTE 1, replace 'Clauses 5 through 11' with 'Clauses 9 through 11'.

3.2.76

In the NOTE, replace 'Clauses 5 through 11' with 'Clauses 9 through 11'.

3.2.96

Replace the existing NOTE by the following:

Note 1 to entry: Permissible values may be specified either as part of a *value domain* (3.2.140), or only associated with a *value meaning* (3.2.141).

Note 2 to entry: Within a value domain, permissible values may either be enumerated or described.

Note 3 to entry: Explicit mapping of a single permissible value to a single value meaning is possible only when both the value meaning and permissible value are enumerated, e.g. for code sets. For described permissible values, the described meaning might be associated with a range of values, e.g. weight in kilograms.

3.2.105

Replace the definition with the following:

identified_item (3.2.64) that is recorded and managed in a *metadata registry* (3.2.78)

3.2.138

In NOTE 2, replace 'must' with 'shall'.

3.2

Add the following new terms and definitions:

3.2.143

conceptual domain definition

formal definition of a *defined conceptual domain* ([3.2.144](#))

Note 1 to entry: The definition may reference externally enumerated value meanings.

3.2.144

defined conceptual domain

conceptual domain (3.2.21) that is specified by a formal definition

Note 1 to entry: The definition may reference externally enumerated value meanings.

3.2.145

defined value domain

value domain (3.2.140) that is specified by reference to an external specification

Note 1 to entry: The external specification should enumerate the permissible values.

3.3.24

Replace 'XTML' with 'XTM'.

Clauses 4 through 12

Replace all occurrences of 'must' in normative text with 'shall', except for:

- 7.3.2.7.2.4 where 'must' should simply be deleted;
- 9.1.2.5.3.1 where 'must' is correct;
- 11.1.1 replace 'must' with 'should';
- 11.4.2.3.2 where 'must' is correct;
- Annexes C, D and F, which are informative.

4.2.2

Replace the whole subclause with the following:

A strictly conforming implementation:

- a) shall support all mandatory, optional and conditional classes, attributes and associations;
- b) shall not use, test, access, or probe for any extension features nor extensions to classes, attributes and/or associations;
- c) shall not recognize, nor act on, nor allow the production of classes, attributes and/or associations that are dependent on any unspecified, undefined, or implementation-defined behaviour.

NOTE The use of extensions to the metamodel or the basic attributes can cause undefined behaviour.

4.3

Rename 4.3 to 'Conformance by feature'.

Append:

", or to specific features within these clauses"

at the end of the first sentence of 4.3.

4.4.2

Add the following NOTE at the end of 4.4.2:

NOTE The additional provisions specified in the above profiles apply only to these profiles, and not to conformance by feature in 4.3.

5.4

Replace the sentence:

"Clauses 6 through 11 of this part of ISO/IEC 11179 specify the types of *metadata objects* that form the structure of a *metadata registry*."

With:

"Clauses 6 through 8 of this part of ISO/IEC 11179 specify common facilities that form the core of a *metadata registry* and which apply to potentially any type of registry content. Clauses 9 through 11 of this part of ISO/IEC 11179 specify the types of *metadata objects* that form the potential content of a *metadata registry*."

5.5.1, list item 2, NOTE

Replace the reference to ISO/IEC 19763-2 with ISO/IEC 19763-10.

Clause 6 (except 6.3.3.1 and 6.3.5.1, see below), and 7.3.2.1:

Change all references to "*datatype* (3.1.8)" to "*datatype* (3.1.9)".

6.3.3.1 and 6.3.5.1

Change all references to "composite *datatype* (3.1.8)" to "*composite datatype* (3.1.7)".

8.1.1, paragraph 1

Replace the second sentence with the following:

ISO/IEC 11179-6 further describes the registration of *Registered_Items* (8.1.2.1), *Administered_Items* (8.1.2.2) and *Attached_Items* (8.1.2.3).

8.1.1, Figure 7

Replace Figure 7 with the following:
