Foreword

ISO (the International Organization for Standardization) and IEC (the International Electrotechnical Commission) form the specialized system for worldwide standardization. National bodies that are members of ISO or IEC participate in the development of International Standards through technical committees established by the respective organization to deal with particular fields of technical activity. ISO and IEC technical committees collaborate in fields of mutual interest. Other international organizations, governmental and non-governmental, in liaison with ISO and IEC, also take part in the work.

In the field of information technology, ISO and IEC have established a joint technical committee, ISO/IEC JTC 1. Draft International Standards adopted by the joint technical committee are circulated to national bodies for voting. Publication as an International Standard requires approval by at least 75 % of the national bodies casting a vote.

Amendment 1 to ISO/IEC 13244:1998 was prepared by Joint Technical Committee ISO/IEC JTC 1, *Information technology*, Subcommittee SC 33, *Distributed application services*, in collaboration with ITU-T. The identical text is published as ITU-T Rec. X.703/Amd.1.

INTERNATIONAL STANDARD

ITU-T RECOMMENDATION

INFORMATION TECHNOLOGY– OPEN DISTRIBUTED
MANAGEMENT ARCHITECTURE

AMENDMENT 1

Support using Common Object Request Broker Architecture (CORBA)

1) **Clause 1**

Update the scope clause to change potential amendment to amendment (in Figure 1).

2) **Clause 2**

Add a reference by alphanumerical order to the ODMA Notification Selection and Dispatch Function:

- ITU-T Recommendation X.770 (199x) | ISO/IEC 15427-1:199x, *Information technology – Open Distributed Management Architecture – Notification Selection and Dispatch Function*

3) **New subclause 2.3**

Add a new subclause for PAS references:

2.3 Publicly available specification references

All references in this subclause were correct at the time of approval of this Recommendation | International Standard. The provisions of the references specifications, as identified in this subclause, are valid within the context of this Recommendation | International Standard. The reference to a specification within this Recommendation | International Standard does not give it any further status within ITU-T or ISO/IEC; in particular, it does not give the referenced specification the status of a Recommendation | International Standard.

Temporary Note – A reference explanatory report is circulated with the DAM ballot on this specification.

- CORBA: *The Common Object Request Broker: Architecture and Specification*, Revision 2.1, Object Management Group, August 1997 (OMG Doc Number: Formal/97-09-01).
- CORBA Services: *Common Object Services Specification*, Object Management Group, November 1997 (OMG Doc Number: Formal/97-12-02).
- CORBA Facilities: *Common Object Facilities Specification*, Object Management Group, Revision 4, November 1995 (OMG Doc Number: Formal/97-06-15).
