Model's properties: each model has coordinate, coordinate index, color, color index, normal, normal index, texCoord and texCoordIndex per vertex.

In the test name, the prefix XX indicates the input file name. In the files attached to this Part of ISO/IEC 14496, 3 Models are considered, cow, dance and eagle.

If a input file, cow.wrl, is tested under SVA mode, circular prediction and Bit precision coding

- Test Name: cow_S_Ci_BP
- Bitstream: cow_S_Ci_BP.s3d (some bitstreams contain *.mp4 files)
- Decoded file: Decoded_cow_S_Ci_BP.wrl
