Foreword

ISO (the International Organization for Standardization) and IEC (the International Electrotechnical Commission) form the specialized system for worldwide standardization. National bodies that are members of ISO or IEC participate in the development of International Standards through technical committees established by the respective organization to deal with particular fields of technical activity. ISO and IEC technical committees collaborate in fields of mutual interest. Other international organizations, governmental and non-governmental, in liaison with ISO and IEC, also take part in the work. In the field of information technology, ISO and IEC have established a joint technical committee, ISO/IEC JTC 1.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of document should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO and IEC shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the WTO principles in the Technical Barriers to Trade (TBT), see the following URL: Foreword — Supplementary information.

The committee responsible for this document is ISO/IEC JTC 1, *Information technology*, Subcommittee SC 29, *Coding of audio, picture, multimedia and hypermedia information*.

Information technology — JPEG 2000 image coding system —

Part 12:
ISO base media file format

AMENDMENT 3: Font streams and other improvements to file format

Technologies de l'information -- Système de codage d'images JPEG 2000 -- Partie 12: Format ISO de base pour les fichiers médias -- Amendement 3: Flux de police et autres améliorations de fichiers

In 8.3.3.3 before

— 'hind' this track depends on the referenced hint track, i.e., it should only be used if the referenced hint track is used.

add

— 'font' used to indicate that a track uses fonts carried/defined in the referenced track.

In 8.4.3.3 after

`'subt'` Subtitle track

add

`'fdsm'` Font data stream track

In 8.5.2.1, after

— hint tracks an entry format specific to their protocol, with an appropriate name.

add

— font tracks FontSampleEntry

In 8.5.2.2 change

```
aligned(8) class SampleDescriptionBox (unsigned int(32) handler_type)
       extends FullBox('stsd', version, 0){
       int i ;
       unsigned int(32) entry_count;
       for (i = 1 ; i <= entry_count ; i++){
              switch (handler_type){
                     case 'soun': // for audio tracks
                            AudioSampleEntry();
                            break;
                     case 'vide': // for video tracks
                            VisualSampleEntry();
                            break;
                     case 'subt': // for subtitle tracks
                            SubtitleSampleEntry();
                            break;
                     case 'text': // for plain text tracks
                            TextSampleEntry();
                            break;
                                   case 'hint': // Hint track
                            HintSampleEntry();
                            break;
```
