Foreword

ISO (the International Organization for Standardization) and IEC (the International Electrotechnical Commission) form the specialized system for worldwide standardization. National bodies that are members of ISO or IEC participate in the development of International Standards through technical committees established by the respective organization to deal with particular fields of technical activity. ISO and IEC technical committees collaborate in fields of mutual interest. Other international organizations, governmental and non-governmental, in liaison with ISO and IEC, also take part in the work.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of document should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives or www.iec.ch/members_experts/refdocs).

ISO and IEC draw attention to the possibility that the implementation of this document may involve the use of (a) patent(s). ISO and IEC take no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, ISO and IEC had not received notice of (a) patent(s) which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at www.iso.org/patents and <https://patents.iec.ch>. ISO and IEC shall not be held responsible for identifying any or all such patent rights.

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see www.iso.org/iso/foreword.html. In the IEC, see www.iec.ch/understanding-standards.

This document was prepared by Joint Technical Committee ISO/IEC JTC 1, *Information technology*, Subcommittee SC 37, *Biometrics*.

A list of all parts in the ISO/IEC 39794 series can be found on the ISO and IEC websites.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html and www.iec.ch/national-committees.

Part 4: Finger image data

AMENDMENT 1: Extension towards improved interoperability with ANSI/NIST-ITL

7.3

Replace:

“The year shall be the year of the publication of this document.”

with:

“The year shall be the year of the publication of the standard or amendment or corrigendum that specifies the used version of the format.”

8.2

Add:

“The encoding example in Clause B.2 is available at <https://standards.iso.org/iso-iec/39794/-4/ed-1/en>. The XSD in Clause A.4 extends the XSD in Clause A.2 by allowing the use of the same palm position codes and impression codes as ANSI/NIST ITL 1.^[3] The XSD in Clause A.4 and the encoding example in Clause B.3 are available at <https://standards.iso.org/iso-iec/39794/-4/ed-1/en/amd/1>.”

Annex A

Insert the following text as Clause A.3.

A.3 ANSI-NIST ITL Harmonized ASN.1 module for tagged binary encoding

```
ISO-IEC-39794-4-ed-1-v2 {iso(1) standard(0) iso-iec-39794(39794) part-4(4) ed-1(1) v2(2)
iso-iec-39794-4(0)}
```

```
-- Permission is hereby granted, free of charge in perpetuity, to any person
-- obtaining a copy of this ASN.1 module, to use, copy, modify, merge and
-- distribute free of charge, copies of the ASN.1 module for the purposes of
-- developing, implementing, installing and using software based on the ASN.1
-- module, and to permit persons to whom the ASN.1 module is furnished to do so,
-- subject to the following conditions:
--
